

Critical Cover® AquaTrak® Boot Covers

SUPERIOR TRACTION IN WET AND DRY CONDITIONS

FEATURES & BENEFITS

These ankle high AquaTrak boot covers provide superior anti-skid properties in wet and dry conditions. A seamless sole design with sonic welded seams makes our ankle high boot covers fluid resistant to liquids and provides appropriate particle holdout. The serged seam version provides for an excellent fit with similar anti-skid properties of its counterpart. AquaTrak material exhibits a low particle count and offers superior protection against particles, biologicals, fluids and light chemical splash.

Construction Details:

Two styles to choose from: seamless, sonic welded seams or strong, stress-resistant serged seams. Different thread colors around the opening provide convenient size identification.
