

Technical Data Sheet

Cleanroom Equipment Suite® Mop Handles

Description

This handle has an ergonomic design which provides operations with full support while still maintaining maximum control during mopping. The mop allows for extension to get to even the hardest to reach places. This mop extends from 103 cm to 185cm and is made from a durable and autoclavable anodized aluminum and plastic.

Product Information

Part Number: Y-SUITE-HDL

Packaging: 1 mop per box

Description: Handle is made of autoclavable anodized aluminum and plastic.

Description

This handle is made with comfort in mind. The grips are made with rounded ends, soft areas and even feature an anti-flip function. It has four color-coded strips for easy tracking of handle locations in your facility. It has an improved locking mechanism in addition to being light weight. The handle extends from 100 cm to 180 cm.
