

CLEANROOM EQUIPMENT

SUITE® 36" FLOOR MOP

DESCRIPTION

Suite® 36" floor mops offer the perfect solution for maintaining cleanliness in large CNC and ISO 8 rooms. Due to their unique design, these mops ensure consistent and adequate application of disinfectant during the disinfection process. These large mops are also ideal for dry mopping.

Our mops are made with Suite's engineered fiber, which allows for more square feet of application per prepped pad. Moreover, the addition of a nylon loop backing further enhances the ease of use, making them an indispensable tool for maintaining cleanrooms and controlled environments.

PRODUCT INFORMATION

Part Numbers:

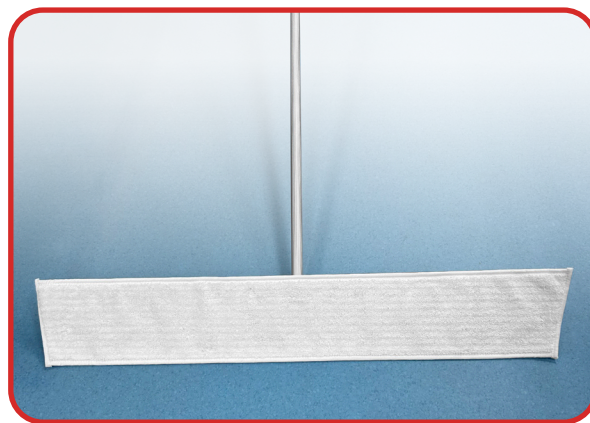

- **Floor Mop Pad:** Y-TL-36FM
- **Handle:** Y-HKN85150
- **Frame:** Y-VKN10534

Description:

- **Handle:** Ergonomic anodized aluminum handle that extends from 33" to 59".
- **Frame:** Anodized aluminum 36" frame with nylon hook and loop replaceable strips.

Packaging:

- **36" Floor Mop Pad:** 3 mops per pack, 10 packs per case
- **Handle:** 1 per bag
- **Frame:** 1 per bag

Reduction and Transfer: Suite® material has been demonstrated to *effectively remove surface contamination. In addition, the carry-over (cross contamination potential) after using the Suite® material is minimized as contaminants are fully retained by the material.

*Lab testing available upon request.
